

**Public (free) mini-symposium on:
ECOLOGICAL EFFECTS OF GLOBAL ANTHROPOGENIC CHANGE**

Where: Folsom Lake College, Folsom, CA; Aspen Hall Community Room (FL1-20)

When: 4:00-7:30pm on April 22nd, 2014 (Earth Day!)

Presentations (~20 minutes each, listed in order):

Theme: Over-harvesting, human-wildlife conflict
Title: Where the Wild Things Are... But Not For Long – An overview of the consequences of top predator removal
Sarah Jennings and Carolyn Whitesell: Ph.D. students, Graduate Group in Ecology, UC Davis

Theme: Disease

Title: A plague o' both your houses! – How complex human-wildlife interactions drive disease emergence in both humans and wildlife

Evan Eskew: Ph.D. candidate, Graduate Group in Ecology, UC Davis

Theme: Environmental Pollution

Title: Living in a plastic prison – Causes and effects of plastic ingestion in marine animals

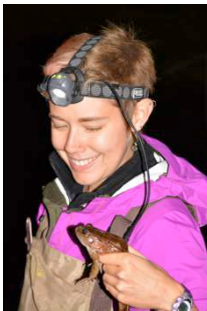

Matthew Savoca: Ph.D. candidate, Graduate Group in Ecology, UC Davis

Short break

Theme: Climate Change

Title: We haven't the foggiest – The role of atmospheric water vapor feedbacks on climate change

James Farlin: Ph.D. student, Graduate Group in Ecology, UC Davis

Theme: Invasive Species

Title: Not so fresh and so clean – Invasive species as a threat to California's native freshwater ecosystems

Rachel Anderson and Jonathan Rose: Ph.D. candidates, Graduate Group in Ecology, UC Davis

Theme: Habitat Fragmentation

Title: Why did the elephant cross the road? – Habitat fragmentation & wildlife corridors in savannah Africa

Jason Riggio: Ph.D. student, Graduate Group in Ecology, UC Davis

Followed by a ~30 minute panel discussion with the presenters
